Somewhere in France

Dear Editor and Friends:

"If I may have a bit of space, I would like to tell you a bit about France and the boys over here. France is really and truly a very beautiful and thriving country. I have covered hundreds of miles through France and have seen some very interesting and exciting sights as well as some not so good. Back in Normandy, I landed at Utah Beach, and the quiet comfortable days and night there were not to be found. Artillery fire seemed to never cease. As we moved along, seeing dead everywhere and destruction of all kinds, well, it made us appreciate home as we had never before, however we soon got used to it and it did not affect us as it did. Some of the going was tough, sometimes we would go like wildfire. Part of the time the Germans retreated so fast we could hardly keep up with them, but now the going is pretty tough, as it was in the beginning.

"I am in an M.P. Combat outfit and we perhaps see as much as anyone, as we keep on the move constantly. I was recently on a post all alone during the wee hours of a moonlit night. A German dive bomber swooped down at tree top level over my head, but, by the help of God, he never released a bomb nor tried to strafe me. However about a thousand yards away, he strafed at two of my buddies, but missed them.

"We would all like to be at home, but we have a victory to win and we

en want to stay until it is over. At Germany's defeat, we wonder if we go home, remain in an army of occupation, or go to the Pacific. As there are about three million soldiers still in the States, we all feel as if we would be glad to put up the rest of our time there and let them see what they can do to lick the Japs. We are not griping because we had to leave our immediate families and friends, sleep in the mud and rain, where danger was imminent, but we have so far, and will continue, to do a good job, but when it's over over here, we all want to come back when transportation is available. We don't worry about our jobs, but we anticipate to enjoy a good night's sleep, a good meal, and know that some Nazi won't keep us jittery all the time.

"The French people give us a nice reception, and admire our great war machine, which is unexcelled. Despite the fact that France has been under Nazi control for four years, it is surprising to see many available articles here that are scarce in the States. I have seen lots of England and Scotland, but, I and I think all of the others prefer France to Great Britain.

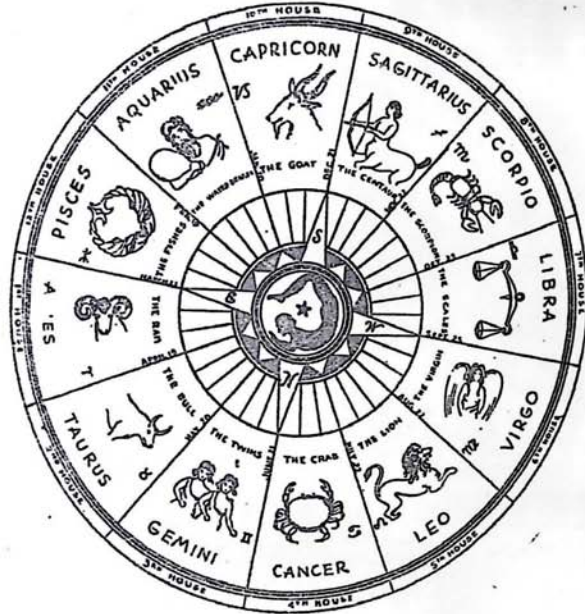

"We wish each and every one of you a Merry Xmas and a Happy New Year. Where we will be, God only knows. The war is not over yet, so keep up the good work. Our morale is high. The road is still long and rough, but some day we will be back and we all will feel proud that we have done our part to bring the world to peace again.

"May Victory bells soon ring.

Pfc. Gaskell Warren."

AQUARIUS

For those born on January 21st to February 19th.

Aquarius is ruled by the planet Uranus and makes you unusual and different. Although likely to be misunderstood by others, are usually ahead of them in thought and action. Uranus is electrical, magnetic, sensational and extraordinary, with due influence on you.

Your success depends upon friendships. Cultivate the understanding of your associates. Aquarius people achieve what others deem impossible, even though not always correct in judging practical matters.

Gemini and Libra people are compatible to you. Those born under Leo are attracted to you but two dominant personalities clash.

A diligent study of the future is wise, as financial transactions and partnerships may cause loss and disappointment through deception. Neptune's influence makes for money trouble this year. Mars, your one source of light, portends favor in legal proceedings, scientific and radio progress. Publicity and promotion work give credit and gain.

January. Make important changes this month. The latter part of the month may present difficulty in business, but on the whole this period is favorable. Your personal affairs should be kept secret and an effort made to avoid signing papers.

February. You will be able to rise above your problems, but only after a struggle. Journeys hold the best opportunity for progress and changes will occur in your financial outlook.

March. Favorable planetary influences should motivate the planned financial changes of the previous month. Some very deceptive vibrations exist now in regard to money. Be cautious and do not heed impractical schemes.

PISCES

April. Short trips, writings and communications to and from important relatives or associates occur this month. Disturbances arising at home will affect your business dealings. Losses in health will occur.

May. Venus will benefit your personal life, thereby lessening a tendency toward unhappiness caused by financial opposition. Travel this month, but avoid credit difficulties.

June. Deception may lead to trouble in marriage, social contacts and public associations. Adverse circumstances will prevail necessitating an intelligent direction of your activities.

July. The early part of this month will present opportunities for greater happiness. Forge ahead with spirit, but retrench the latter part of this period. The last week brings sorrow in personal relationships.

August. Subtle gossip, rumors and hypocrisy will attack your honor and credit. Take no assertive action but remain on the defensive. Those most trusted may turn against you.

September. Improved conditions will mark this month as one of happiness and financial gain. Tidings from a distant place will alter your life considerably. New plans will find favor.

October. An older person will exert a strong influence over your affairs. This will be to your advantage. Life will have a more solid basis for social and financial improvement.

November. This month is usually unfavorable to Aquarius people. Strong adverse planetary movements will bring critical days. Desires for change will be frustrated through lack of strength and health to attain your goal.

December. Your new plans for this month, and the coming year, will succeed. Dreams of security and permanence in private life, will be fulfilled. Drastic action on the 19th of the month should be avoided, because jubilation over your success tends toward overconfidence.

For those born on February 20th to March 21st.

Pisces, extremely spiritual and psychic, is the last of the twelve signs of the Zodiac. Neither too positive nor too negative, these people have an even temperament, which holds them above uncongenial environment, and unimpressionable to distracting elements.

Physically, they are not strong, and should guard their health well. Excesses of food and drink, over stimulation of the imagination and undue anxiety will bring about illness, unless checked.

Love of humanity often causes you personal unhappiness, as others take advantage of your generosity. Your psychic ability to perceive the causes of injury and hurt to others, may lead to a misunderstanding of your motives.

These people make great spiritual leaders although those born during the first ten days of March may be easily dominated in other ways.

Jupiter, the one bright spot in your life during the year, combined with your own evident psychic powers will succeed in bringing order out of chaos.

January. Personal affairs, friendships and aspirations find favor in the positions of the planets this month. Demands upon your finances will bear down, and may prove exorbitant. An older person causes sorrow.

February. Sorrow will prevail this month through friends and relatives. Financial gain caused by Jupiter's influence will bring increased income. Partnerships will prove unreliable.

March. Your own health and welfare should be carefully guarded over this month because of adverse signs. Environment will be subject to change. New plans should wait until more favorable circumstances prevail.

April. Your earning power will increase, and financial transactions will prove profitable during this month. Domestic trouble may cause unhappiness.

May. Investment risks and speculation should be avoided. Be discreet. Concern over business, financial and employment, will add to trouble caused by those you love.

June. Opportunities for important changes in business should be looked upon with favor after the first two days of the month. Health problems may also be successfully met.

July. The Sun, influencing favorably all your moves this month, will bring happiness in love, and profits in business and finance. The 19th will bring some problems which, however, may be overcome after the 21st.

August. Overwork and strain may necessitate medical attention. Relatives and loved ones may worry you. Difficult conditions will take their toll on nervous energy.

September. Although you will not be completely satisfied with improved conditions this month, certain events will occur which will be for the best. Change in environment will benefit you.

October. Startling new problems and opportunities for gain will confront you. Difficulties will be met however and your chance for happiness is increased. Utilize this period to full advantage.

November. Greater obstacles will fall in your path than those of Oct. Trouble with superiors and loss of employment is indicated. However, you will sail serenely through these storms.

December. After the ninth of the month the positions of the planets will be very favorable. Affairs will be greatly accelerated. Substantial progress and new friends are indicated.

ARIES

For those born on March 22nd to April 20th.

An aggressive, active nature, which can be either controlled or not, according to one's development of poise and character, are characteristic of Aries. These people come strongly under the influence of Mars. Avoid speaking too abruptly and frankly as some people may misunderstand an open heart and mind for aggressiveness and a desire for criticism and dominance.

Be careful about expending too much nervous energy. Your enthusiasm, a quality much to be desired, may carry you too far. This is the first sign. You are a natural leader and are splendid in moments of great emergency.

January. Improvement of your income will be your chief concern this month. Next will be your friends. Venus, however, will tend to smoothen your path.

February. Turbulent, exciting, and dangerous days await you this month. "Breaks" with your old life will not be so difficult to experience as you had thought.

March. March is a secretive month for you. Hospital experiences and secret enemies will be encountered. Conflict will come with partners in business. Guard your letters and communications.

April. A slow but sure upward financial trend will present itself this month. Venus makes a desire for improvement outstanding in your mind.

May. Mercury will influence your finances this month. Curtailed income and necessity for sharing it with others will restrict you.

June. Deceptive influences as to health and environment will prevail. Let pleasant friends and pleasures absorb you this month. Try to have a pleasant summer.

July. Venus again influences your life. Overcoming adverse conditions of Mars, Venus will bring favorable financial deals and profit to you. The latter part of the month may bring disturbances.

August. Business will continue good this month, but avoid hazardous and speculative enterprises. Defer important undertakings until late in September.

September. Mercury enters Libra thereby activating business and partnerships. Changes may occur in financial matters. Take trips, and undertake the things you have been putting off.

October. Employment will not be favorable and health may suffer this month. Your home life however, will be serene, and advancement in business will occur during the last week.

November. This month, like February, will bring danger and turbulence. Avoid unnecessary trips and travel. Quarrels will bring unhappiness.

December. Sorrow and restrictions will impede your progress. Loss to you by deceptive persons will be caused by too much faith in others. A change is in store for you this business month.

TAURUS

For those born on April 21st to May 21st

Venus, the good luck planet, rules the sign of Taurus. It gives a fine personality, much talent and natural ability. Taurus is the sign designated by money. It brings much prosperity and success in life. In order to realize the outstanding success, that is promised by Taurus, spiritual development is necessary. Your mind is very strong, stubborn unyielding when once raised in opposition to anything, and is inclined to vibrate toward material things rather than spiritual and uplifting. You must avoid allowing your affections to reach those unworthy of your love. You may be inclined to excesses in food, drink and pleasure. This will be harmful in that it will obscure more important successes in life. In vocational work, those lines of endeavor which will allow an outlet for your practical ideas, will be best suited to you. It is most essential that you have rest and quiet for the contemplation and deep thought necessary for your best work.

January. You will have opportunity to travel or make important changes during the early part of January and should endeavor to take advantage of every opportunity which comes to you at this time. Gain through other people in finance and investments are favored.

February. Stimulation of your professional and business affairs will occur this month. Credit or financial difficulties will arise with those in authority, but you should be able to realize your hopes. It is probable that you will make changes in your home life.

March. New hopes and aspirations can be realized this month if you do not shirk responsibility that will be placed upon your shoulders by others. Be careful of your business and employment for March will otherwise bring trouble.

April. The influence of Mars remaining in the sixth house of your chart tends to make you "overdo" and "overwork" yourself. Venus will benefit you and bring expressions of affection from others.

May. Avoid taking advantage of any propositions offered to you this month. Anything of a retarding or limiting influence will irk you and cause a desire for freedom and self-expression.

June. This month may find you with worry over financial matters. Be careful that this fretting does not cause ill health. Some change in your domestic life may be expected.

July. Conditions in general will change greatly for you and you will be in a better position to manage your affairs. Forge ahead in all your endeavors and activities and try to build a real and solid foundation for your future life.

August. The aspect of Mars will be likely to cause accidents and turbulence in your domestic and financial affairs. An upset state of mind will lead to trouble in your domestic and social life unless you succeed in curbing impulses to be hasty, biting and sarcastic.

September. September presents opportunity for splendid progress and change. Separations occur with others, but the changes you now make will be of your own violation, and will materially benefit you.

October. You are living more or less of a visionary life which you have longed for during past years. The position of Venus in the house of "emotion, talents and pleasure" will be very helpful to you.
